

Cattle Health and Performance

Foundation

Gut health stability is critical for raising profitable beef cattle. Bio-Mos is a healthy and cost effective way to achieve this.

Bio-Mos is a natural, stable supplement for beef cows and calves made from a sugar derived from a select strain of yeast that supports gut health and integrity.

Bio-Mos is tried and tested. Over 400 trials on all major species and a 14 year market presence demonstrate that Bio-Mos works 24/7.

Quality control is important to you, and Alltech is committed to manufacturing reliable and traceable ingredients. Bio-Mos is ARC certified. The ARC quality control system is exclusive to Bio-Mos and based on true biological activity, guaranteeing consistency with every batch.

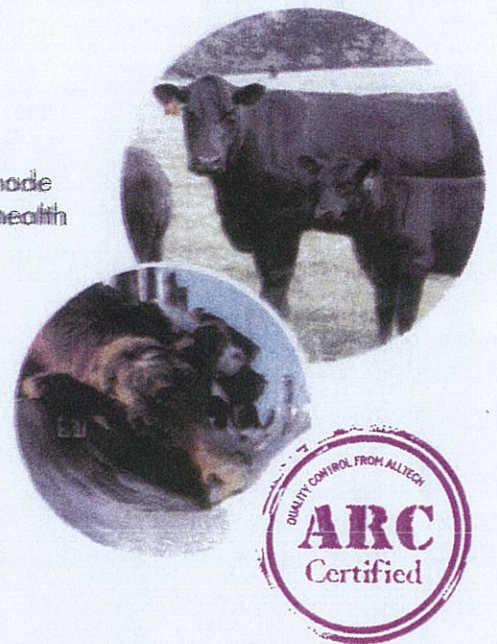

Performance

Bio-Mos has a defined mode of action and benefits beef cattle by fundamentally maintaining gut health and stability. Bio-Mos is also allowed for use in organic diets by select associations. Bio-Mos supports:

- ✓ Cow-calf health and livability
- ✓ Optimal growth and development
- ✓ Reduced use of therapeutic treatments
- ✓ Cow-calf management
- ✓ Nutrient transfer from cow to calf

Healthy cattle yield healthy profits:

Bio-Mos Performs. Promise.
